Project Title: Freedom Schools Website

I would like the site to be four pages with a couple of sections on each page. I would like to have a navigation bar at the top. For the most part, the content can be split similarly to how Wikipedia does it.

- **Introduction/ Home** - this can just be the first little section of text on the wikipedia article followed by the text from the origins section with a few images
- **Mississippi Freedom Schools** - I'd like this section to include the political and educational objectives and the curriculum (you can leave out the citizenship curriculum questions)
- **First Year** - you can skip the Freedom Library Day School section
- **Legacy and Sources** - I would appreciate it if you could include maybe a labeled picture from the CDF freedom schools program because I think it's a really important program. Obviously, please cite your sources, I think for this project a list of links should be fine.
