

## Site Review Notes

Hi Annabel,

Overall, I think the site is looking great! I just have a few (hopefully small) changes that I'd appreciate:

- I want the max column width for all the text to be smaller. When I viewed the site at 1000px wide, I thought the line length was a lot more readable than at full width.
- On the first year page, I'd like the headings for each section to be more visible, maybe bump up the text size or place them above the paragraphs or on the left side of the text blocks (maybe instead of the "how it started - instruction- conclusion you have now?").
- This is tiny, but on the First Year and Legacy pages, I noticed you forgot to take the citations out of the wikipedia text.
- Lastly, I don't think the page is working very well responsively right now. I'd like for the text to become full-width when the page gets narrow (maybe below 600 or 700px) because right now I don't think it makes sense to have a huge empty column on the right when the text is feeling squished.

I think you've done a great job incorporating the style from your mockup into a real site. I love that all the pages feel like the work in a set but also have enough variation to keep a viewer engaged!

Thanks!

Mia
